

ADRIANA CHRISTINA QUIROZ CORREA

Junior Software Developer | Laravel | ReactJS

Phone: +591 75318561 | Santa Cruz, Bolivia | English: C1 | christinaquirozcorrea@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

I am a detail-oriented Junior Developer with a strong foundation in software and full-stack web development. I have skills in Laravel, React, Git, among other technologies, and solid experience in building responsive user interfaces. I am also a fast learner and easily adapt to new tools and development environments.

PERSONAL PROJECTS

- **Conversational Assistant implemented with Graph RAG – NARET (MongoDB, Express.js, React.js, Node.js, Python, Neo4j, LangChain)**
 - Thesis project for the Cathedral Museum of the Metropolitan Cathedral of Santa Cruz, Bolivia, developed using the ICONIX methodology.
 - Developed a graph-enhanced RAG pipeline to improve search capabilities.
 - Designed and prototyped user-friendly interfaces to interact with the assistant.
 - Implemented a Python API to connect with the GPT-4o-mini model and receive responses based on the context of museology and artistic pieces.

EXPERIENCE

trabajito, Santa Cruz, Bolivia

03/2024 – 10/2024

Frontend Developer - Intern

- Actively participated in the redesign of user interfaces, implementing approximately 60% of the views based on PSD files, ensuring visual accuracy and usability.
- Identified and implemented backend logic for a LIFO test functionality, along with the design of a user-friendly interface.
- Developed advanced job search filters, enabling the combination of multiple search criteria.
- Worked within the SCRUM methodology framework.
- Tech stack: Laravel, PHP, jQuery, Blade, Bootstrap, MySQL.

SolverTIC SRL, Santa Cruz, Bolivia

07/2023 – 12/2023

Junior Software Developer

- Developed software focused on Mobile App and Business Web platforms.
- Implemented user interfaces and other frontend tasks for a Real Estate module, including the consumption of services within the application.
- Responsible for the development of RESTful API services for the same module.
- Tech stack: Flutter, Firebase.
